## Strategic Data Management Joins the Credant Technologies Partner Program

INDIANAPOLIS, IN – Strategic Data Management [www.sdmindy.com](http://www.sdmindy.com) announced it has joined the Credant Technologies Partner Program. Strategic Data Management will sell and support Credant's data protection solutions for laptops, desktops and mobile devices.

*"The most overlooked part of most organizations' IT security is the mobile workforce and data protection. We are excited to offer our customers the leader in endpoint data security protection. By implementing the Credant suite of security solutions customers can be assured their information is protected no matter where the data exist in the enterprise."*, says James Jordan President of Strategic Data Management.

From laptop and USB encryption to CD-DVD recorders, iPods and Smart Phones, CREDANT's patented solutions help our customers effectively meet regulatory compliance requirements, manage a few to tens of thousands of devices from a single console, ensure data protection does not interfere with user productivity, deliver advanced compliance reports and policy management and reduce Help Desk and operations staff time managing endpoint data security.

*"With the enactment in 2008 of Indiana's House Bill 1197, requiring full disclosure of data breaches involving unencrypted devices, we are proud to team with Strategic Data Management. Companies across and beyond Indiana can now secure data, prove it is secure and avoid the need for breach notification"* stated Darren Shimkus, Vice President of Global Channels and Business Development at CREDANT Technologies.

**About Strategic Data Management:** Founded in 2007, Strategic Data Management provides expertise in managing organizational data needs. We make your data available in a classified and secure fashion across an organization. Strategic Data Management leverages relationships with partners and integrate the best of breed products to provide customized solutions, consulting, and support to manage and protect your data.

### **About CREDANT Technologies**

CREDANT® Technologies is the market leader in endpoint data protection solutions. CREDANT's data security solutions mitigate risk, preserve customer brand, and reduce the cost of compliance, enabling business to "protect what matters." CREDANT Mobile Guardian is the only centrally managed endpoint data protection solution providing strong authentication, intelligent encryption, usage controls, and key management for data recovery. By aligning security to the type of user, device, and location, CREDANT permits the audit and enforcement of security policies across all computing endpoints. Strategic partners and customers include leaders in finance, government, healthcare, manufacturing, retail, technology, and services. CREDANT has been recognized by Inc. magazine as the #1 fastest growing security software company in 2008 and 2007; was selected by Red Herring as one of the top 100 privately held companies and top 100 Innovators; and was named Ernst & Young Entrepreneur of the Year® 2005. Austin Ventures, Menlo Ventures, Crescendo Ventures, Intel Capital, and Cisco Systems are investors in CREDANT Technologies. For more information, visit [www.credant.com](http://www.credant.com).
